Event open to the public – freewill offering taken

### ***“Wonders of the Bible with 3-D Laser Holography”***

Mr. Frank DeFreitas returns tonight with another exciting 3-D laser holography demonstration. Included this time will be images of an ancient Torah scroll section covering Creation to the Flood, the famous Allende meteorite dating back to Creation itself, a 3-D laser hologram of the “Face in the Shroud (of Turin)” (full frontal and reverse 3D computer generated images, along with a full-sized Shroud display), micro- and nano-scripture and more! Focus will also be on the actual science and technology behind the exhibit items, explaining what a laser is, how holograms are made in the laboratory and how laser communications can be used to spread the gospel of God.

**Please join us and bring a friend!**
